DETAILED ACTION

1. Applicant's October 17, 2007 REMARKS have been reviewed. The previous rejection is withdrawn pursuant thereto.
2. Claims 1-8 and 39-58 remain pending in the present application.

Claim Rejections - 35 USC § 103

3. Claims 1-8 and 39-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ephrati et al., US 7,296,001.

Ephrati discloses a network based trading system and method where a product and services, e.g., cols. 1-3, and where a seller is notified of the particular product or service when the buying criteria, does not match the seller criteria and outputting a list of deals in real-time from amongst the plurality of deals. Ephrati does not explicitly disclose a service and distribution criteria.

The Official Notice previously taken from the July 17, 2007 Office Action that distribution criteria has been common knowledge in the electronic marketing art is deemed admitted by Applicant as this assertion was not traversed. To have provided such for Ephrati would have been obvious to one of ordinary skill in the art in view of Official Notice. To have provided common knowledge real-time notification for Ephrati would have been obvious to one of ordinary skill in the art.

The Examiner is acutely aware of the prosecution history of the present Application. However, the present action is deemed warranted given the nature of the claim language in juxtaposition with the newly discovered prior art.
